

Connect People and Communities

A New Standard of Excellence

Use the incredible power of industry specific software designed by operators of senior care communities. Connect people and communities in one single sign-on solution. Leverage our powerful enterprise software to monitor and measure performance across care groups and communities.

A Proactive Care Model

Our solutions put the right information, in the right hands, at the right time to enhance care and improve workflow.

Improve Facility Performance

With a single sign-on, compare facility and staff performance metrics across care groups and communities, helping you identify strengths and opportunities for improvement.

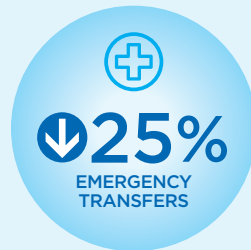

Customized Healthcare Intelligence

Let the software do the thinking for you, 24/7. In real-time, use a fully customized solution for your operations to monitor and measure care trends and performance.

Proven Outcomes

Operators of senior care communities are using Nxtgen Care to achieve positive care outcomes.

“Since we first launched Nxtgen Care, our residents are getting better quality care because of the accountability the platform provides. Our Nxtgen Care Enterprise Scorecard has become a primary tool for our management team and facility administrators. So much so that we’d be lost without it.”

— **Cindy Stancil** VP Operations, Liberty Senior Living Management
